

LUMINARIA

Folding Instructions

Step #1: Take an unfolded bag and double crease the top of the bag so that it is about the width of a quarter. Carefully fold the creases inside-out to create a double folded sleeve. If the bag tears visibly, discard it. Consistency in the width of the fold is critical.

Step #2: Count stacks of one dozen (12) bags each. Face each dozen in the same direction (i.e. all folds to the right). Alternate the openings of each dozen as you stack them, and place five dozen into an unfolded bag – you may use a defective bag from step one for this.

Step #3: When you have a total of three bags of five dozen each (15 dozen), pack these into a Trader Joe's Grocery bag.

Step #4: Fold the Trader Joe's bag as follow:

- * Firmly press down the 25 dozen bags to make it more compact
- * Fold down the creased sides towards the center.
- * Now fold and press the wider edges down firmly until you get an overlapping seal.
- * Immediately place a strip of sealing tape across the top.
- * Complete the seal by placing another strip of tape perpendicular to the first.

Step #5: With a magic marker, write your name, ensemble and the total number of dozen folded bags on the outside. Congratulations! You have just completed a full bundle of 15 dozen folded luminarias.
